

PANEL-SEAL[®]

For Dried Lumber & Dimension Stock

A thin wax emulsion used to seal the end grain of dried lumber and dimension stock.

THE BENEFITS OF PANEL-SEAL

- Prevents new end checking (drying splits) in dried or partially dried lumber
- Reduces checking and glue joint separations at the edges of glued dimension panels

APPLICATION, COVERAGE & USE

- PANEL-SEAL can be brushed, rolled or sprayed on.
- One gallon covers approximately 150-200 square feet, depending upon application method.

PROPERTIES & STORAGE

- PANEL-SEAL is a stable, non-toxic, non-hazardous wax and water emulsion.
- PANEL-SEAL should be kept in temperature controlled areas above 50°F/10°C and is not combustible unless dried and exposed to temperatures in excess of 400°F/205°C. Winterized formulations will protect against freeze damage.

DIRECTIONS FOR USE

PANEL-SEAL should be applied on rough dimension stock and panels end grain and should not be used on finished wood products or prior to staining/finishing.

DIRECTIONS FOR USE (CONT.)

- **Equipment:** PANEL-SEAL can be applied with spraying equipment. We recommend using one of the following sprayers, available from U•C Coatings:
#PE4102 Electric Sprayer #BP501 Backpack Sprayer
#PG6500H Gas Engine Sprayer
- **Application:** Care should be taken to not get PANEL-SEAL on the faces or sides of dimension stock. It is intended for end grain only.
- **Clean-Up:** Use hot, soapy water to clean equipment. Solvent cleaners are not recommended or needed.

PURCHASE OPTIONS

- Available in clear
- Available in winterized formulations to protect against freeze damage
(Winter-based coatings protected with antifreeze will withstand exposure to temperatures below 32°F. This protection allows coatings to bond to the ends of cold/frozen logs and lumber. U•C Coatings takes no responsibility for products not protected with antifreeze that are frozen after delivery.)
- Available Quantities:
275-gallon tote
55-gallon drum
5-gallon pail
